 **KEB Hana Bank**

## **Registration**

MyHana Internet Banking is equipped with MyToken as additional security device for financial transactions.

This device will display one-time 6 digits which will change every 30 seconds, which will be used by customer to make a more secure financial transactions.

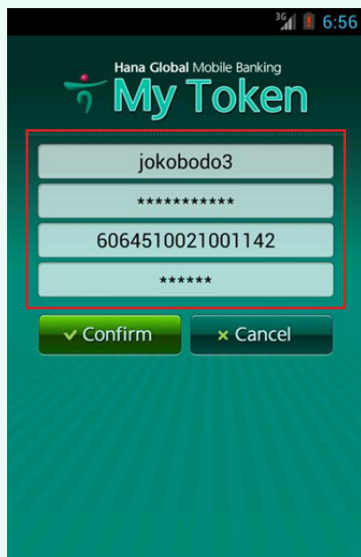

If customer chooses not to utilize MyToken, then customer may only use non-financial transaction on MyHana Internet Banking such as Balance Inquiry and Account History.

## **MyToken Activation**

After MyToken app has been downloaded and installed on mobile phone, customer will be asked for UserID, password, debit card number and debit card PIN.

Then, when all of the information has been confirmed, customer will be asked to input new PIN for MyToken.

Customer who has installed MyToken on their mobile phone may still install it on another device. However, customer may only use MyToken on the mobile phone that was installed later.
